FLSA: Exempt

LOCATION: Boston Headquarters

CONTACT: HR Department [hr@naca.com](mailto:hr@naca.com)

BENEFITS: Excellent single/family health and dental PPO, 75% employer contribution & 401K

---

## **NACA**

NACA is the country's preeminent non-profit homeownership and advocacy organization with over two million Members through over forty-five offices nationwide. Over the past thirty years NACA has established a track record that has earned both the respect and fear from others in the lending industry. NACA stands out in the following areas: 1) It is the most effective organization in the country in providing affordable homeownership; 2) It is the place to work to fight for economic justice for those dedicated and willing to work hard; and 3) It provides unprecedented opportunities for staff to do well financially by doing good.

Started in 1988, NACA has won campaigns against some of the country's most powerful companies and individuals that engaged in predatory and discriminatory lending. NACA's success is a result of its aggressive, confrontational advocacy and state-of-the-art systems and operations. The purchase program provides comprehensive counseling as HUD's largest housing counseling agency (through its Neighborhood Stabilization Corporation subsidiary) with access to NACA's Best in America mortgage: no down payment, no closing costs, no requirement for perfect credit and always at a below-market, fixed interest rate. NACA has over \$15 billion in mortgage commitments from the country's largest lenders to support this program. Through its HomeSave program for homeowners with an unaffordable mortgage, NACA is also the most effective in providing affordable solutions and has done so for over 250,000 at-risk homeowners nationwide.

Built on this track record of success, NACA is undertaking rapid expansion across the country with the hiring of many additional staff nationwide. NACA continues its aggressive advocacy in fighting for economic justice for low-to-moderate income people and communities. In addition to affordable homeownership, NACA takes on economic justice issues such as student debt, tax equity, income inequality, environmental and other issues. Employees at NACA have a tremendous impact on the communities and the Members they serve. For more information about NACA, its history and programs, visit [www.naca.com](http://www.naca.com).

## **IT SYSTEM ADMINISTRATOR**

The System Administrator is responsible for the day-to-day operation of NACA's computer networks. He/she organizes, supervises, and oversees installation and support of NACA's computer systems, including local area networks (LANs); wide area networks (WANs), network segments, intranets, and other data communication systems.

Other responsibilities include: the technical planning, implementation, maintenance, and recovery procedures for mission critical enterprise systems. System Administrators serve as the primary technical expert in the area of administration of complex network operating systems. System Administrators are responsible for the installation, configuration, administration, monitoring, and security of NACA's servers and related components thereby achieving a high degree of performance and reliability of essential business applications.

The System Administrator possesses a working understanding of Linux, Microsoft Server, and VMware Virtualization technologies. They are responsible for daily administrative duties involved in supporting, maintaining, monitoring, and configuring servers composed of physical and virtual infrastructure components, including VMware ESXi Host, vCenter, Linux, and Windows virtual machines.

---

## **JOB RESPONSIBILITIES**

- Ensures the availability of client/server applications, configuring all new implementations, and developing processes and procedures for ongoing management of the server and virtual environment.
- Manages, maintains, and supports, the VMware vSphere infrastructure hosting the server environment.
- Plans and implements server upgrades, maintenance fixes, and vendor-supplied patches.
- Performs file system configuration and management; defines and performs server backups and recovery procedures.
- Monitors and tests system security logging and provides performance statistics and reports.
- Recommends and executes modifications to the server environment in order to improve efficiency, reliability, and performance.
- Identifies, troubleshoots, and resolves hardware and software problems on servers and workstations.
- Escalates business impacting incidents as necessary.
- Coordinates and collaborates with various departments using business management applications and database administration functions to ensure availability, reliability, scalability, and security of corporate data.
- Creates, maintains, and manages Microsoft Active Directory user accounts.
- Installs, modifies, and maintains system and application software on server computer systems.
- Establishes guidelines and methods for the installation and management of network operating systems, disk arrays, Cisco switches, Cisco routers, tape libraries and other components.
- Ensures high availability and acceptable levels of performance of mission critical network resources.
- Participates in the installation, upgrade, diagnostics and repair of structured cabling.
- Develops procedures, programs, and documentation for backup and restoration of server operating systems and server-based applications.
- Develops and maintains training materials and server documentation.
- Manages the data center and network host systems including hardware, software, and equipment.
- Assists in overseeing the security, integrity, and safety of server and network systems.
- Contributes to data center standards, development, and enforcement.
- Stays current with technological developments in systems administration applications and recommends ways for NACA to take advantage of new technologies.
- Perform on-call responsibilities for support of critical infrastructure as required.
- Positions in this classification may perform all or some of the responsibilities above, and other related duties as assigned.

## **TIME DEMANDS:**

The System Administrator must be able to meet the demands of the job that consists of 50+ hours a week. This is a demanding position requiring dedication and the willingness and ability to work long hours including evenings and weekends.

## **COMPENSATION:**

The salary range is \$65,000 - \$85,000+ based on experience, skills, degrees and certifications. The candidate's performance evaluation and future compensation is largely based on meeting the Job Responsibilities, Competencies and Skills stated herein.
