

NACA's HAND

Home And Neighborhood Development Program

3607 Washington Street, Jamaica Plain, MA 02130

617.250.6222 office
866.228.8834 fax

Attention Home Inspector:

As part of our ongoing effort to better serve our members, NACA has developed specialized software for our home inspections. After extensive research, we have contracted with HomeGauge to provide this software program. It is the best in the business and has the flexibility to provide for NACA's requirements.

NACA will now require that all inspections for NACA Members use the HomeGauge software. All NACA home inspections must be submitted on line and no other home inspection or method will be accepted. The information from the reports will be uploaded onto our website and downloaded into our software system (NACA-lynx) for NACA's Housing Consultants to review.

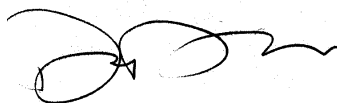

Home Inspectors are required to use the NACA-HomeGauge software to be able to do inspections for NACA Members. NACA will provide this software program at no charge for NACA inspectors. The software is available for download from our website at: www.naca.com and can be tested at anytime.

In order to become a NACA qualified Home Inspector you must do the following:

- Become familiar and adhere to NACA's program and its goals.
- Have the ability to take digital photos.
- Use the NACA-HomeGauge software downloaded from <http://www.naca.com>.
- Have the ability to upload home inspection reports.
- Use email.
- Fill out the on-line application at www.naca.com.

NACA has become the largest and most effective homeownership in the country. We recently announced a \$6 Billion commitment with Bank of America and have over \$10 Billion committed to NACA's best in America mortgage program. We look forward to adding you to our list of NACA qualified home inspectors.

Sincerely,

Robert Caruso , HAND Program Director
